

Solenoid Valves for Domestic RO System

Model R 180 2.5

R series valves are direct acting solenoid valves having 2.5 mm orifice. Designed to meet specific requirement of domestic RO systems.

Features

- ✓ Longer life.
- ✓ High strength, Glass reinforced body.
- ✓ Metal cased coil for better heat dissipation.
- ✓ ¼" BSP threads.
- ✓ Mounting holes.

Applications

- ✓ Domestic RO systems.
- ✓ Compressed air systems.

Specifications:

1.	Body Material	Nylon / Polyacetal
2.	Diaphragm Material	Silicon Rubber (Standard)
3.	Maximum Temperature of Media	95° C
4.	Maximum Water Head	300 mm (12")
5.	Maximum flow at 300 mm Head	40 ml per second
6.	Type	Two way, normally closed
7.	Duty Cycle	Continuous
8.	Drain Tube (Only in model V90D)	Silicon rubber
9.	Available coil voltage	12 V DC, 24 V DC
